Bunpougayowaianataepdf14 __FULL__

-4-3-gb-14-8l-top -m2 And I was wondering why it doesn't show up when I just try to paste it into php and open the console? I think I'm missing something here, but what I'm not sure what it is I think you guys got it right. I have two php scripts that work together. One of them calls the other one. What I'm trying to do is make it so that the second script call, the php script, can't work unless we insert it with php and open it. Here's my php script php //
