MPEG4 File Joiner is a tiny and portable application that you can use to merge two MPEG4 videos into a single file, namely.m4v and.mp4 formats. It doesn't include complicated options or configuration settings, making it accessible to all types of users. No setup required Since there is no installation involved, you can save the downloaded files to a custom location on the HDD and just double-click

the.exe to launch MPEG4 File Joiner. Another possibility is to keep it stored on a removable storage unit, like a USB flash drive, in order to seamlessly run the tool on any computer with minimum effort. It doesn't change any settings to the Windows registry. Simple interface and options When it comes to the GUI, the program adopts a normal window with a classical appearance and neatly organized structure, where you can use the file browser to locate and select the two

MPEG4 clips you want to join. Once you specify the output directory and filename, you can start the operation with one click. Afterward, you can open the destination folder to launch the video file in your media player and check out quality results. There are no other notable options available here. For instance, the utility doesn't support batch processing, so you can convert only file video clip at a time. Evaluation and conclusion Tasks were completed fast in our tests,

during which MPEG4 File Joiner remained light on system resources consumption. On the other hand, it displayed an unspecified error on a couple of occasions and failed to successfully finish the conversion jobs. We must also take into account that it hasn't received updates for a long time and it likely has compatibility issues with newer Windows editions.

Nevertheless, you can test the app for yourself, since it's free.

This tutorial shows how to compile and install Sothink NpVideo on a Windows 10 computer using the Sothink NpVideo Windows 10 package. Requirements: I downloaded the latest version of Sothink NpVideo, extracted the contents, and copied them to my Windows 10 PC, then double-clicked the NpVideo.exe and setup wizard asked me to sign in with the account on the Microsoft

website. I entered the required email address and password. Now I signed in, clicked on the Continue button and then on the NpVideo welcome screen, then I clicked on the Setup button in the lower right corner. The next step was to select the destination folder to save the NpVideo, after this I selected the license agreement. I then selected the license key in the drop-down list. The next step was to specify the output video format, I then selected MP4 and then advanced. I then

selected to encrypt the NpVideo file and finally selected the device name, I then proceeded to the final installation step, I specified that I wanted to keep the Windows version, click Next. I now created a shortcut on the desktop. I then selected from the drop-down list the installation location, I clicked on the Set file location button and specified the path, and then proceeded to the last step, which was to complete the installation. Installation steps

taken. Extracting the NpVideo source code to a folder. Unzip it into a temporary folder. Copy the NpVideo source files to the destination folder. Launch NpVideo. Run NpVideo as administrator. Select the output folder (destination). Choose the NpVideo files, and add any subtitles (if there are any). Click Start to begin the conversion process. Download AV Converter Platinum V 8.5.5 (May 22, 2015) AV Converter Platinum V 8.5.5 is

easy to use and fast converting software. With a simple, convenient interface, you can convert video formats without spending much time. It supports most of the audio and video formats, and can be used to convert between video formats and audio formats.
