The program looks very amateurish and the lack of a key features list and customer feedback is a huge flaw. This might have been a great program if it had worked well. I like the idea. Now I have the choice of viewing a ppt that has been converted into an APP like format. It is a big plus to be able to embed flash presentations into websites. The conversion is easy to accomplish and all the PPT importation problems have been eliminated. The author was able to fix the issue of converting PDF files to Flash Presentations. However, when importing Microsoft PowerPoint files, the application seems to lose most of the formatting. It deletes text, images and themes. PowerPoint should be able to export the formatting with the presentation as well as the font color and size. I love this product. It did exactly what it said. It does create flash presentations from any slide projector type presentation, that is, from PowerPoint, Excel, Google Sheets b7e8fdf5c8
