Tarnished is an action role-playing game where you put your sword in your hand and roam freely in a vast world. This is a magical fantasy game that gives you the action of the arcade, but feels like an RPG.

Elden Ring is THE fantasy-RPG that rivals titles such as the Final Fantasy series, Disgaea, and Dragon Quest. Tarnished's young developer, Yamamoto Eetu, is the creator of the game, and has previously made title games such as *Makai Kingdom* and *Gunland*. Tarnished is built on the same engine as *Makai Kingdom*, but the production values have been greatly improved. Many of the pieces in the game, including the intricately detailed enemies, come off a 3D printer. A sister game to *Makai Kingdom*, Tarnished will also feature the character models that have become Yamamoto Eetu's trademark. In particular, the character model of the "battle maiden" named Silencer is a difficult and original creation drawn not just from an anime series, but specifically influenced by a picture of a real-life Italian battle maiden in the British Museum.

What's new:

Encyclopedia Erenlya (ed) A very brief break to tell you that I'm far from being fond of the sudden wow factor and I believe it's not necessary at all.If I want to praise something, it's Ultima Online's NOVA, this work being comparable only to it. When I say Ultima, I mostly mean the games from Origin, including the Saga of Atlantis, Garth games and Ultima Online. Cause the server itself, together with all the players and the usual discussions we all can be proud of something big.In the end, the most important thing is to have fun. And if we have fun, we have other things to do also.Thanks again to all the players who provided input for this project. Without you, we'd have no community and no mod. I hope you (and I) can see all those who are waiting for you on ZTRP. Fantastic game. Character development is amazing and the world is well designed. I hope it works outside of Paradox server too. EDIT: I love the way the music in the background changes to the points in the story. You can choose the song to change to, but you can't really change it's tempo, so in the beginning all music is at normal speed, when it gets to a town it gets a little bit faster, when it gets to your trainers it will slow down to nadarit's pace, when it gets to your fortress it will become a little bit faster again, at some point it will again get slower again (Why? i have no clue). You can hear the problem, but it's well done, man, brillant. I'm damn proud of you. I know UO is a huuuuge project and for sure has gone on for many hours, perhaps the hardest part would be to not to fall into a habit of re-doing the same stuff all over again.Not saying I expected so, but I have no doubt UO has inspired many, and one thing clearly is the deserved popularity and success of "the thing that matters." Ahh, it has for me, but that's probably because I really enjoy my character, he really

fun to play. In my opinion, what makes SOE games special are the possibilty to create a very personal experience with your character in a totally unique setting where story and environment enhances itself. Maybe this is a bit off-

Mon. 10/17/12 12:33am JSFridays: Seriously, though, if I had the rush to get into the Rep before my partner's gig..... if it was within 9-11 miles... um, I'd be there. If the venue was on my way home, I'd definitely roll over. But.... Mon. 10/17/12 12:38am Wes Martin: Not a bad one, but needs some direct criteria for it to rate like that. Mon. 10/17/12 12:40am JSFridays: @Wes Martin: Ya, that's on me. Does it have to be in the continental U.S. or what? Mon. 10/17/12 12:46am Wes Martin: Well, it's got to be fine enough that girls by and large would be rather excited about seeing the guy, for the sake of the spectacle. But more than that, you have to provide a fair amount of reasons for them to do it. Mon. 10/17/12 12:50am JSFridays: ... I agree with that, regardless of the 49er victory in the superbowl. forward. The telescoping devices have a swivel joint allowing the tip of the stent to be rotated about an axis of the tube, and both telescoping devices are connected together at their axial ends by a clip-on joint. U.S. Pat. No. 4,410,562 (Baier) teaches a stent having a plurality of helically wound metal springs attached to the stent at one end and each spring has a coupling element at the other end adapted to join the coil springs in an array allowing a lengthening or a shortening of the stent by moving the ends of the coil spring along the axis
