EA Sports™ FIFA - the world's leading football action game franchise - is back with FIFA 22. Since the launch of FIFA 12, the game has undergone a fundamental gameplay transformation that is unprecedented in the franchise. With an all-new engine powering every aspect of the game, including: FIFA Ultimate Team™; improved dribbling; smarter, more engaging commentary; more realistic player movement; better passing, shooting and goal-kicking; and an entirely re-engineered Career Mode, FIFA 22 lets you experience the game the way FIFA players do. What's new? Three on the ball. Football gameplay continues to be enhanced with three on the ball. Now, if a player is carrying the ball, even on his own pitch, his team can still be marked as a free player on the ball to stop them from breaking away from the opposition. This works differently based on where the ball is - for example, when a player is carrying the ball into a free space, his team can no longer be marked as a free player. Ambidextrous free kicks. Ambidextrous free kicks become available with a new playstyle mechanic. Players can set their 'cheek bias' for left or right - with a left-to-right bias, for example, they aim to use the inside of the foot on right-footed shots. Players can now choose whether to use their inside or outside of the foot, and choose their foot in a new way. Players can even decide to use their heels as well - this mode works like a player with a left-to-right bias aiming with a right-footed shot. When a left-to-right bias is chosen, the ball will start flying from the outer half of the penalty area. When the player uses the inside of the foot, the ball will start flying from the inner half of the penalty area. This opens up a huge range of options when taking a free kick. Revamped passing. Passes to feet have been adjusted to better match gameplay action. The kicking strength of passes is increased and pass accuracy is improved. This should result in easier and more fluid passes. Increased ball control. Picked up the ball is now easier and more natural to a player with increased control over the ball - a great way to control the ball in your strongest area. In the game, we have taken FIFA to the next level of creativity and innovation, both on and off the pitch. In Career Mode, you can
