The Mythical Power of the Elden Ring All of the races of the Elden Ring are descendants of a divine race that once fell into an endless darkness. During this time they were brought to light by a powerful spell. This mysterious spell is the Elden Ring, and although they are practically powerless now they can become powerful again in a certain situation. A Magus who is blessed with the blood of the divine race becomes an Elden Lord. These "Elden" are the descendants of the Magus that gained the power of the Elden Ring. When the Magus falls into the endless darkness, the current Elden Lord will appear and remain unchanged at their side. It is with great effort that the Magus who has gone into darkness is brought to light, and this

effort is called... "The Elden Ring"! Story of the Elden Ring In a place that is neither this world nor the next, a mysterious spell is being performed. As magicians from the four lands are going about their business, a magus who resides in the Nether, a world ruled by darkness, disappears from sight. As time passes by, it was said that a spell is being performed to send a magus from the Nether to the next world. Despite how far the magus who has been sent to the next world has traveled, he still returns to the Nether, and the place where the spell is being performed is engulfed in darkness. This is the story of the Elden Ring. * Note: Any use of the term "Magic" or the name of a spell is purely for the purpose of roleplaying and not for the purpose of any kind of real magic.
