I could not choose between the two so I went with what I felt was the easier option. The first is an excellent book on our subject that anyone studying this will find a useful aide memoire. It is well written and easy to follow. If you are new to English your problem is likely to be what the book calls "word wall". There are examples in the text, but these are few and you would be well advised to see if anyone in your course can help you out with translation! This has been of huge benefit in my course and I have really recommended it to everyone I have come in contact with. The next option is an excellent primer and manual for what is a difficult subject. The author is experienced in the teaching of English and is experienced in the subject and thus he will be able to give you a thorough grounding in the complexities of the grammar. He includes a number of video clips and his writing is for the most part quite engaging. I would highly recommend this book. From my experience in the staff room I would recommend: Grammar: Either book, both would work. Rhetoric: Neither, your needs in this area would probably be met by reading a couple of novels and enjoying them. Writing: Either, or, both. You really do not need to buy two books! If you had to choose between the two books I would recommend The Writing Tutor by James Tucker. This is an excellent book that I have used in several courses and it has made a world of difference. It is full of answers to the questions you ask yourself such as: how to turn a good sentence into a good essay? This would be a good choice for students thinking about their options. Another great book on this topic is also by James Tucker. More recently there has been a book by Peter Smith called Teaching English Grammar that has now been

---

superseded by the freely available book from Oxford called Teaching English Grammar. I recommend this book if you are looking for a book that would make a good reference tool in your course and this is available as a pdf that you can search for and print as many times as you need. As an aside I would recommend also that before you buy a book that you also read a couple of samples to see if the book is really what you think it is. There are many books where you read the first paragraph and think that you have just wasted your money. I know of several such books that people have bought and
