i have tried many different freeware versions of xpaddder on different game consoles. overall, this freeware version is the best. the most recent version of windows is a must for this program to work properly. overall, i like using xpaddder to play my games. its simplicity, paired with the most recent version of windows os, enables me to play games on a new gaming platform with some expertise. if you want a quick and straightforward way to get a full-featured controller support system for your game console, i highly recommend buying this programme. there are numerous more reasons to obtain this programme as well. you may, for example, get the most recent version of xbox kinect directly from their website. this feature alone may persuade you to buy xpaddder rather than the packaged version. xpaddder is a simple and compact windows programme that allows you to use your gamepad in your usual windows environment without any hassle! its absolutely free, and it lets you map keys to the buttons on your xpaddder gamepad with ease. there are various handy capabilities that allow you to perform things like type text into windows, drag windows from one page to another, resize game pads, launch multiple applications at once, edit and restore different game pads, and much more. support for touch screens, the option to use your keyboard for various input capabilities, and the ability to use several joysticks at the same time are just a few of the more intriguing features. ive been using this fantastic software for quite some time now, and i couldnt be happier. to begin, xpaddder works with windows 10. you may have to do some windows registry tweaking if you arent using windows 10. if youre using the standard setup for windows 10, you will be greeted with the xpaddder setup wizard. youll then be asked to select your desired controller, and you can also select one of xpaddders pre-set configurations. you can select either the xbox controller profile or the vita controller profile. you can choose to map up to six buttons to a controller profile, and there is also an option to select buttons for each profile. you can then choose to set the key used to trigger the profile. for instance, if you have a xbox controller with the xbox profile, youll be able to toggle between the xbox d-pad and the a, b, x, y, l, and r keys. you can then select a key for the profile to be triggered by, and you can set the sensitivity of the profile. the profiles can be set to both pan and tilt, or tilt only. if youre using a gamepad that has built-in joysticks, you can select to

map them to different buttons, and you can set their sensitivity. you can also set the number of profiles that can be used at once.
