Keywords: GPS Map Viewer, point of interest, google maps, GPS Map Viewer was added by leruburg in Mar 09, 2013.

The file was downloaded from SourceForge.net. The program reaches its official version 1.0; however, it is still in beta. You can run GPS Map Viewer as a 32-bit or 64-bit application, depending on the operating system. Some platforms are compatible with 32-bit apps, while others do not allow this. The 64-bit version is not necessary for Windows 7 users. The most popular platforms are: Windows XP, Windows Vista,

Windows 7, Windows 8,  
Windows Server 2008,  
Windows Server 2008 R2,  
Windows Server 2012 and  
Windows Server 2012 R2. GPS  
Map Viewer runs on a clean  
and intuitive user interface,  
allowing you to import maps  
using either the file browser  
or drag-and-drop method. It is  
also possible to drop a  
directory, in order to explore  
its contents and open maps.  
On the left side of the screen  
you have a tree view for

exploring the directories of any map file (if any). You can save GPS Map Viewer to a USB flash disk or similar storage unit, in order to run it on any PC with minimum effort and without previously installing anything. What's important to take into account is that the Windows registry does not get updated with new entries, and no new files are created on the disk, leaving it clean after removal. The user interface is clean and

intuitive, allowing you to import maps using either the file browser or drag-and-drop method. It is also possible to print maps, configure printing settings, and preview printing. The program is pretty light on the system resources, using low CPU and RAM. It is very responsive to commands and works fine, without causing the OS to hang, crash or pop up error

GPS-GTK is an open source software development kit (SDK) for GPS-enabled devices, which consists of a GPS simulator and a C/C++ library. The GPS simulator provides the basic GPS functions: measuring and displaying the time and the position, reading the satellite data, determining the position and speed. The library is the core of the library, and is also

the interface between the simulator and the application. GTK+ Map is an extension to the GTK+ framework for developing applications that use maps. It provides a core library with all the basic map functions that GTK+ Map applications use. GTK+ Map applications that are based on this core library are called a "compatible mode" GTK+ Map applications. GTK+ Map applications that are developed with the GTK+ Map

Application Builder tool can be either a "compatible mode" GTK+ Map application or a "native mode" GTK+ Map application.
