Keymacro is a lightweight, open source program, developed in the C# language, that allows to create macros in Microsoft Word. It is intended to speed up the tedious operations (i.e. copy/paste, fill a form, etc.) that happen frequently in the Office programs, and to simplify the same boring procedures. The program is able to recognize the most used mouse buttons, mouse cursor movements, and to record up to 250 mouse clicks. The list of selected features may be expanded up to 2,000. Moreover, you may create macros with a few simple clicks, and the macros are stored in a special folder, so they can be retrieved at any time. Additionally, Keymacro enables you to automate the process of creating slide shows, and in case you want to include voice recordings, a microphone is needed. Keymacro comes with a great variety of features that can be enabled/disabled with just a few clicks, but it also enables its users

to get professional, useful macros created in accordance with their needs, and to choose the color of the custom slides, as well as the positions of the custom objects. Some of the ready-to-use slides are: * Accounting * Biology * Career * Chemistry * Computer Network * Geography * History * Math * Mechanical * Physics * Psychology * Social * Sports * Vocabulary * Word

In addition, you may record your own voice, include images, fill forms, drag objects on the slides, and customize the layout. The program also offers a range of tools, such as the ability to schedule tasks, get the list of executed macros, export macros to other Microsoft Office programs, and convert existing macros. Lastly, Keymacro enables you to share your macro files with other people and get statistics about how many users have accessed the information contained within the specific macros. Bottom line Keymacro is a feature-rich application whose purpose

is to make the most boring and time-consuming tasks in Microsoft Word significantly faster and easier. In addition to the existing features, the program provides the ability to create voice recordings as well as customize slides. Despite its drawbacks (such as poor user interface), the utility is definitely worth a try. Some of the downsides are that the documentation is minimal, as well as the availability of detailed information about the program.

wonders at preventing popup

advertisements on Web browsers. You can

create your own custom list of websites that

can't be blocked by the app. There is a drop-

down menu where you can choose the

location where you would like to save the

list. The latter is then saved into a.txt or.csv

file that you can then send to your friends.

The tool is incredibly simple to use and you

can learn it in no time. Simple but yet very

effective and useful application designed to

block pop-ups on Web browsers without the

need to use a single mouse click. You simply

need to allow the program to open pop-ups

and it will take care of the rest. Software

What's New In?

How often do you try to visit a specific website, only to find that it's displayed as an annoying ad before it? What's worse, you then lose your precious browsing time? Your Popup Blocker Program will help you to block all pop-ups from all your favorite websites. You can define a list of websites to avoid the pop-ups. The program detects the main pop-up sources and shows you pop-ups from all sites on your whitelist in one

window. When you visit a link on a whitelisted site, the program shows a notification and creates a popup blocker rule so that pop-ups don't appear on the next visit to this site. You can delete an item from the whitelist, allowing a pop-up. You can also add a site to the whitelist. What is more, the program can play an auditory reminder when an ad is blocked. Limitations
